DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group 1 in the reply filed on 12/12/2008 is acknowledged. Since group I is drawn to a method of using a compound of formula I, then claim 11, drawn to the compound of formula I limited to compounds wherein A-N, will be joined with the method of group 1. Claims 4-10 are withdrawn from consideration. Claims 1-3 and 11 will be examined to the extent that they read upon formula I wherein A = N.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-3 and 11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for compounds wherein only one of X and Y is IIa or IIb, Z is tetrachloro-phenyl and B1 and B2, if substituted, are only substituted once by -SO₃H, does not reasonably provide enablement for compounds or methods wherein X and Y are both Iia or Iib, Z is other than tetrachloro-phenyl and B1 and B2 are substituted by more than one moiety or the moiety is other than -SO₃H. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected to pigments to make or use the invention commensurate in scope with these claims.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are unclear because the claims are drawn to modifying an organic pigment crystal by adding the compound of formula I. To what? Any solvents added? Are there any further steps? Clarification is required.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

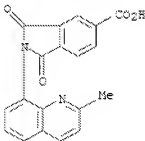

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-3 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by JP

2001335711 and DE 2924066. JP teaches compounds such as

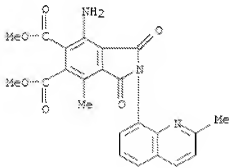

PN 377741-57-6 CA
CN 1H-Isindole-5-carboxylic acid, 2,3-dihydro-2-(2-methyl-6-quinolinyl)-1,3-dioxo- (CA INDEX NAME)

as being part of pigment dispersants and photosensitive compositions. DE teaches compounds

FN 77554-64-4 CA
CN 1H-Isindole-5,6-dicarboxylic acid, 4-amino-2,3-dihydro-7-methyl-2-(2-methyl-6-quinolinyl)-1,3-dioxo-, 5,6-dimethyl ester (CA INDEX NAME)

such as

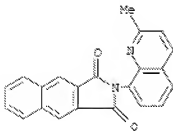

useful in fluorescent agents.

11. JP teaches compounds such

CN 1H-Benz[*f*]isindole-1,3(2H)-dione, 2-(2-methyl-6-quinolinyl)-

as

teaches compounds such as
